Types and use of Mobile Rigs: -

- ❖ There are five models of Truck mounted Drilling Rigs / Workover Rigs at your options
450HP, 550HP, 650HP, 750HP ,1000 HP
- ❖ All the rig's Systems of Power, Drawworks, Mast, and Traveling Block transmission systems are equipped with the self-propelled chassis. The rig is easy and low-cost to transport, and it has reliable performance, a large working load, and good off-road power.
- ❖ The basic parameters and overall design conform to the SY/T5202-2004 Main Parts conform to the API specifications and the requirement of HSE, and applied API monogram on them such as Mast, Substructure, Drawworks, Traveling Block, Hook, Crown Block, Swivel, Rotary table and Mud Pump. Etc.
- ❖ Adopt mature, reliable, and practical advanced technology. Key components of diesel engines, transmission cases, and so on are selected imported components
- ❖ Installations are in strict accordance with the standards of the original manufacturers.

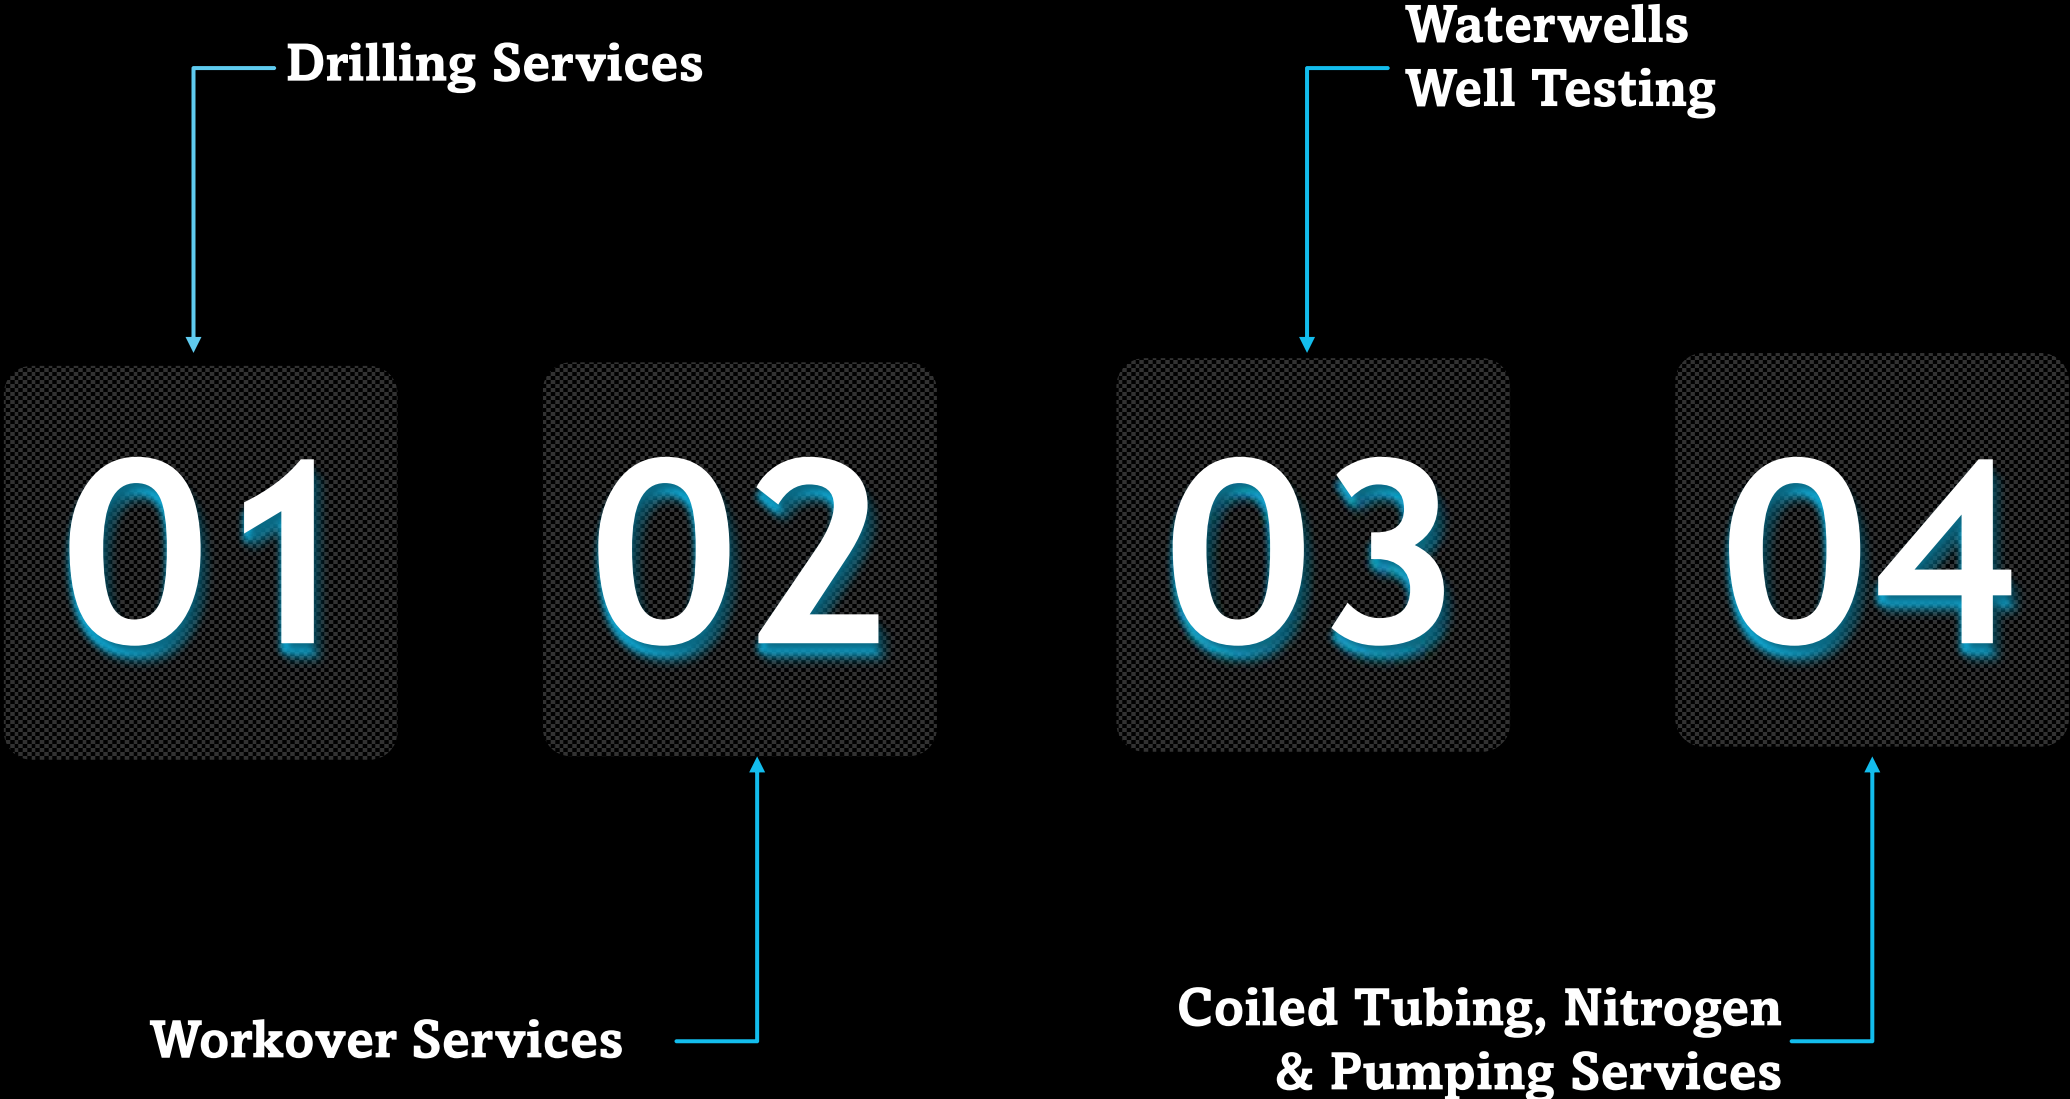

Light Duty Onshore Workover Rigs:-

- ❖ The whole unit structure is compact. It uses hydraulic & mechanical transmission with high synthetic efficiency.
- ❖ The workover rig adopts Class II carrier having a few kinds to meet user's requirements.
- ❖ The mast is face open single or double telescoped sections, hydraulically or mechanically raised and telescoped

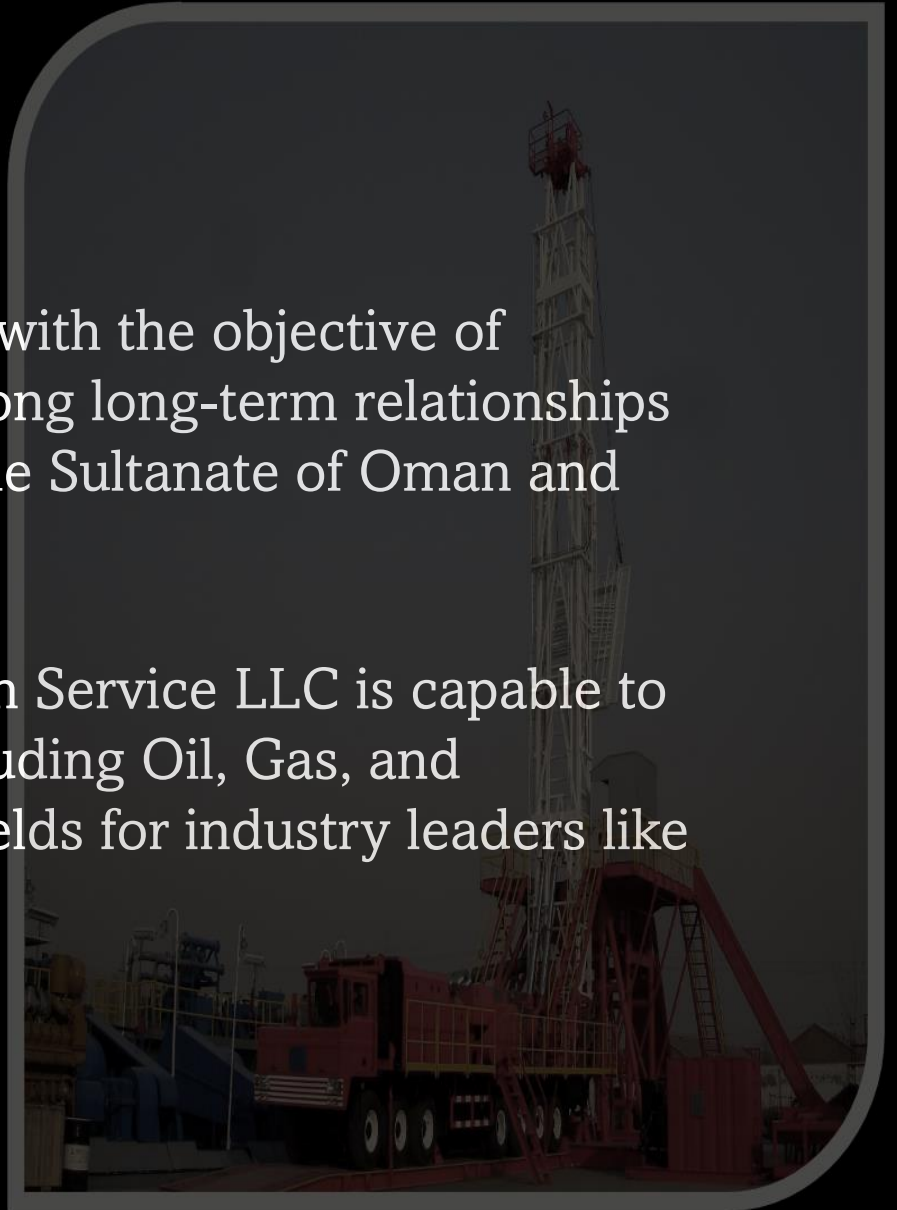

Services & Solutions

Drilling Services:-

Grand Drilling & Petroleum Services has been established with the objective of providing quality drilling services. Its focus on building strong long-term relationships makes GDPS the partner of choice for businesses across the Sultanate of Oman and the Middle East region.

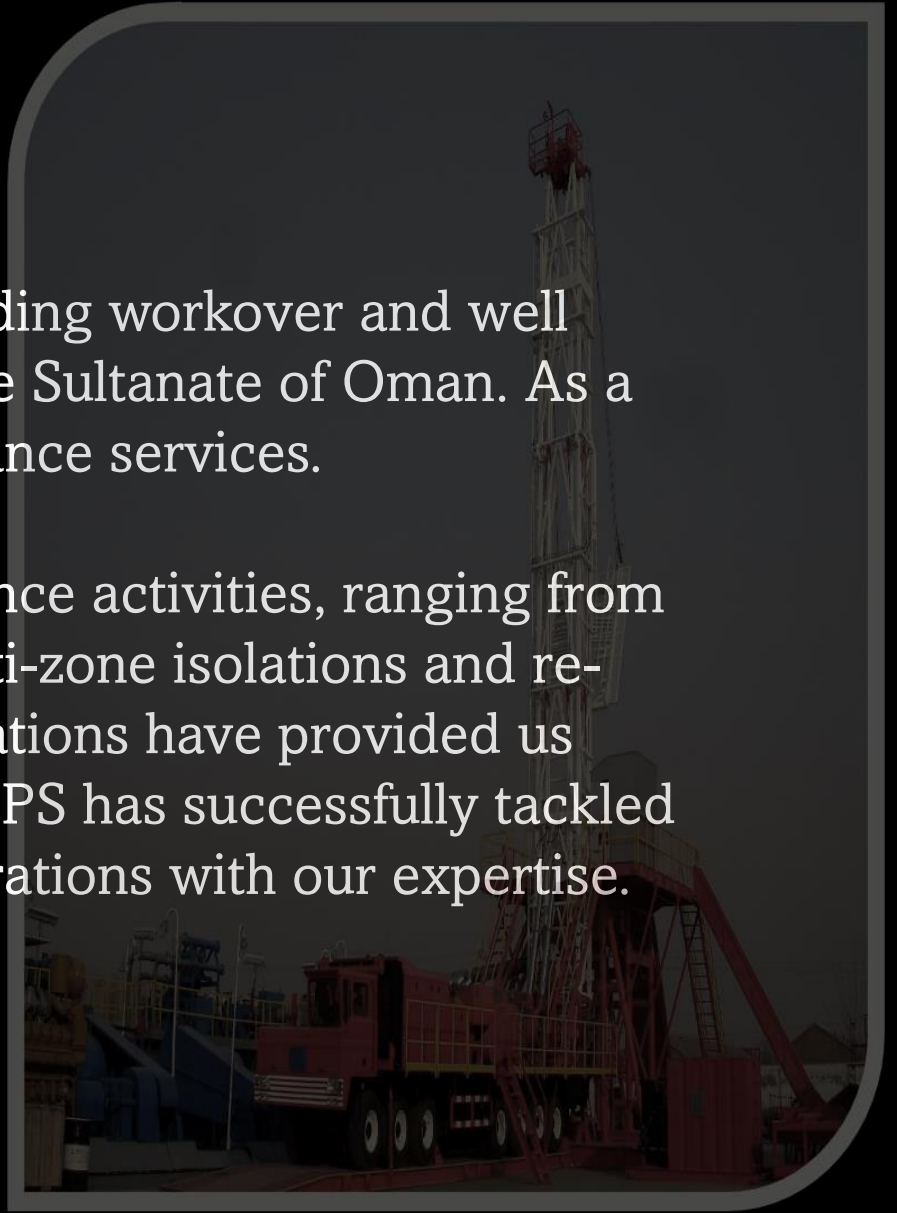

As a leading drilling contractor, Grand Drilling & Petroleum Service LLC is capable to operate drilling rigs to drill up to 20,000 ft depth wells including Oil, Gas, and Geothermal wells in both Exploration and Development fields for industry leaders like Petroleum Development Oman (PDO)

Workover Services:-

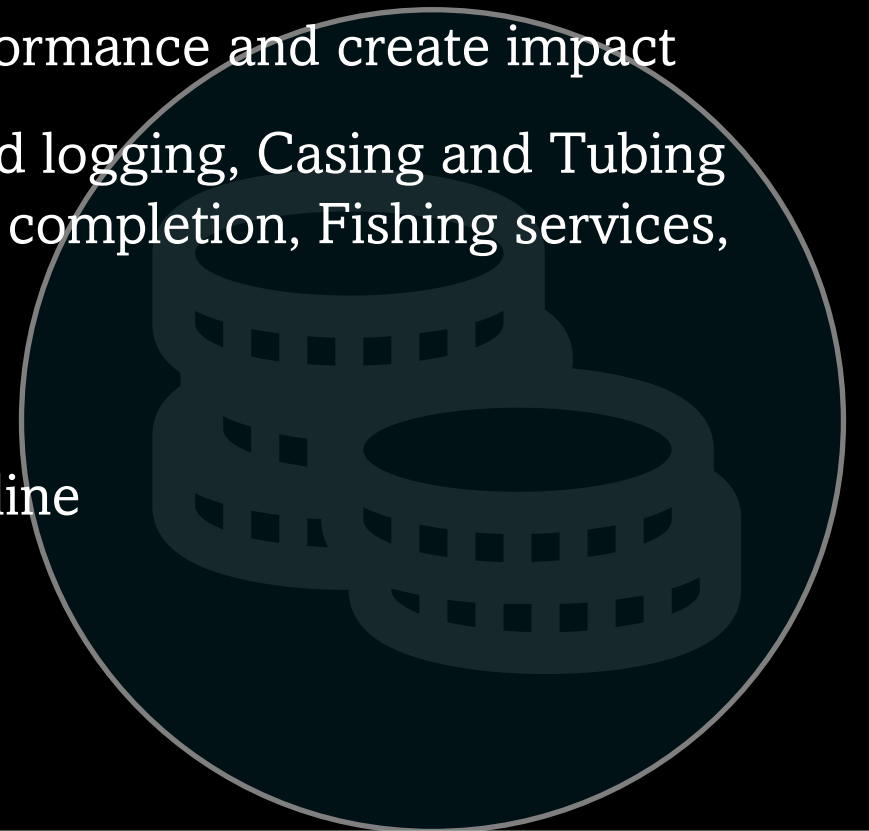

Since 2013, GDPS has built its reputation as one of the leading workover and well services providers and Well Intervention Contractors in the Sultanate of Oman. As a recognized lead contractor for integrated oil well maintenance services.

Our services include standard and complex well maintenance activities, ranging from beam pump replacements on artificially lifted wells to multi-zone isolations and re-completions in vertical borewells. Successes of these operations have provided us with a great foundation for the next level of expansion. GDPS has successfully tackled several highly demanding and technically challenging operations with our expertise.

Business Model Core Value

- ❖ Well Engineering: Commitment to excellence in everything we do and transfer to our Clients
- ❖ Onshore Drilling: Continually striving to reach optimal performance and create impact
- ❖ Comprehensive range of drilling services: Mud service, Mud logging, Casing and Tubing running, Cementing service, Coring, Open and Cased Hole completion, Fishing services, Directional Drilling, Drill Stem Testing
- ❖ Well-testing and stimulation
- ❖ Well Intervention Services – Coiled Tubing, Nitrogen, Slickline
- ❖ Workover and rehabilitation services, sidetracking

Key Value of GDPS

- ❖ Delivering comprehensive services in line with customer expectations
- ❖ Knowledge and experience that guarantee success
- ❖ Professional Staff and a fully operable fleet of drilling rigs and well service equipment
- ❖ Respect for people and the environment
- ❖ High standards of project management
- ❖ Effective use of available technology
- ❖ The achievement of ambitious goals
- ❖ Expand activities into a sphere of CSR with particular emphasis on local content
- ❖ Provide the safest workplace and its environment
